

The Washington Cities Electrical Code

The following Cities have adopted this Code: Bellevue, Bellingham, Burien, Des Moines, Kirkland, Marysville, Mercer Island, Normandy Park, Renton, SeaTac, and Tukwila.

The Washington Cities Electrical Code is a joint effort between the MyBuildingPermit.com (MBP) ECityGov online portal and the Washington Association of Building Officials (WABO). This Code was created to provide cities with a document that complies with RCW 19.28.010(3), which allows cities to enforce any Ordinance that is equal, higher or better than the State's rules, but offers the following advantages.

- 1 This Code omits all administrative and procedural State rules that cities cannot or choose not to adopt.
- 2 This Code is written in the same format as the NEC to eliminate any conflict between a State rule and the NEC. This format will also allow the creation of insert pages that can be inserted into the applicable pages of the NEC.
- 3 This Code provides enforcement consistency among those cities that choose to adopt it.
